## La Punt

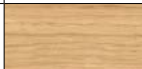

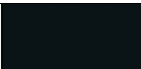

### Working table 122 Werktafel 122

Design:  
Mathias Seiler

La Punt is a space-saving solution which meets all the requirements of a professional computer workstation in the home office. Essentially, La Punt is a bridge-like solid wood console desk with a fold-away work surface, making it suitable for any home. Not least thanks to its solid wood construction, it is an office desk which fits perfectly into living spaces. Power can be accessed via a fold-away cable tray. To ensure stability, the desks are secured to the wall by two screws. Desks can also be ordered with counterweights for stable free-standing use. The range also comprises various sideboards and highboards that can be combined to create customized workspace solutions. The front of the drawers and the shelves are made from a thin solid core panel. They are also available with a FENIX coating, a matt nanotech material which makes the surface elegant and soft to the touch.

Met La Punt wordt op een ruimtebesparende manier voldaan aan de eisen die professioneel thuiswerken vereist. Het meubel bestaat uit een massief houten console met een inklapbaar werkblad. Dankzij het inklapbare blad, past La Punt in elke woning en de massief houten console past in elk interieur. Elektrificatie is mogelijk door middel van een inklapbare kabelgoot. De werktafel wordt met twee schroeven aan de muur bevestigd om kantelen te voorkomen. Indien gewenst kan La Punt worden uitgevoerd met een contra gewicht zodat deze vrij in de ruimte geplaatst kan worden. Daarnaast zijn er diverse sideboards en highboards verkrijgbaar welke met individuele werkplekken gecombineerd kunnen worden. De ladefronten en legplanken bestaan uit een dunne volkern plaat. Optioneel hebben ze een Fenix-coating, een mat nanotech-materiaal dat het oppervlak een edele en fluweelzachte touch geeft.
