

## Climate protection certificate

For Girsberger Holding AG

**girsberger**

### Voluntary contribution to climate protection

The company Girsberger Holding AG promotes sustainable development for both the environment and society. It purchases SWISS CHARTER Units (SCU) to offset CO<sub>2</sub> emissions that cannot be reduced through its own measures. By acquiring CO<sub>2</sub> certificates, Girsberger Holding AG supports the Fair Recycling Foundation's recycling project in Brazil, contributing to climate protection, the maximum possible reduction of greenhouse gas emissions, the accelerated achievement of the national and global 'net zero' targets and UN Sustainable Development Goals (SDGs).

To offset the impact of its remaining direct and indirect Scope 1 and Scope 2 emissions in 2024, Girsberger Holding AG is compensating for 910 tonnes of CO<sub>2</sub>e for the following companies:

- Girsberger Holding AG, Bützberg - Switzerland
- Girsberger AG, Bützberg - Switzerland
- Mobimex AG, Seon - Switzerland
- Girsberger GmbH, Endingen - Germany
- Boreal doo, Kraljevci - Serbia

The project supported by Girsberger Holding AG is verified by SWISS CHARTER.

With this certificate, Fair Recycling confirms that the emission reductions have indeed taken place and that the corresponding climate protection certificates, known as SWISS CHARTER Units (SCU), have been retired.
