

Marva – a homely office chair with hidden integrated ergonomic functions

Key information:

Girsberger has developed “Marva”, a new functional swivel chair. This model’s many ergonomic features and adjustment options are not immediately visible. On the contrary – with its homely appearance and rounded, soft shape, the chair fits in perfectly with the ideal of the modern office, which is increasingly incorporating aspects of personal surroundings and becoming more homely. Its key feature is a new, extremely flat synchronic mechanism, which is fully and invisibly integrated into the seat.

Bützberg, 18.02.2021 – The new functional swivel chair “Marva” offers a good solution to the increasing homeliness of the office environment on the one hand, and the requirements of a home office on the other. Its designer, Mathias Seiler, set out to create a swivel chair with concealed integrated ergonomic functions and a softer shape.

„Marva“: an ergonomic office chair with a homely shape and concealed integrated synchronic mechanism. The zip on the back emphasizes the chair’s homely character and use of fabric.

Press release

Packed with ergonomic features, this model has a synchronic mechanism with automatic spring tension for dynamic sitting, precise adjustment of the seat, backrest and lumbar area, and multiple armrest settings. There is a second mechanism option with additional fine spring tension adjustment and engageable negative seat tilt.

The backrest is concave, shaped to enclose the body, and fully covered with fabric. The model's soft, rounded shape provides an exceptionally homely feel, while its fabric look is emphasized by the zip on the reverse of the backrest. Extra comfort is ensured by the soft, generously padded seat and the armrests made from soft PUR foam with large oval tops.

The round and oval shapes give the "Marva" functional swivel chair a particularly homely appearance.

Ergonomic workspace – also at home

"Marva" is also available as a counter chair

About the designer:

Mathias Seiler, born in 1963, studied industrial design at Hamburg University of Fine Arts under the tutelage of Prof. Dieter Rams. He has worked internationally as a product designer for various renowned furniture makers and has received numerous awards. Mathias Seiler has had overall responsibility for design and marketing at Girsberger since 2010.

About Girsberger:

The Swiss company group was established in 1889 as a woodworking shop and soon made its name as a manufacturer of seating furniture. Today, it focuses on providing high-quality and innovative furniture solutions for offices, public spaces and homes and has particular expertise in processing solid wood.

Its own production sites combine a variety of different manufacturing disciplines, thus providing a high degree of production versatility and allowing the strategic move into Customized Furniture and Remanufacturing. From Koblenz, close to the border with Germany, the solid wood trade unit supplies all types of wood-processing businesses with top-quality solid wood.

Today, the international company group is managed by Michael Girsberger, who is the great-grandson of the company's founder. Outside Switzerland Girsberger has sales companies in Germany, France, the Benelux countries, Austria and Turkey; the company's headquarters are in Bützberg, near Berne. Production locations are situated in Bützberg (Switzerland), Endingen (Germany), Kraljevci (Serbia) and Silivri (Turkey).

Girsberger introduced climate-neutral production in 2015 and was awarded the EcoVadis gold medal for its transparent, sustainable supply chain in 2019.
