

Alteo – an easily movable folding table for agile working

Girsberger presents Alteo, the versatile range of folding tables: an easily movable table on castors that can be quickly and conveniently placed wherever it is needed – ideal for effective, communicative office environments requiring activity-based furniture. The foldable tabletop can be connected to neighbouring tables, while the frame is stackable and can be equipped with a power supply.

Bützberg 22.9.2022 – Alteo, the easily movable folding table on castors, can be stacked and stored in larger quantities to save space thanks to its vertically tilting tabletops. Among the special features of this practical and versatile model are the high-quality solid wood tabletops in a choice of oak or walnut.

Alteo can be used in many different ways, and is particularly suited to flexible project and team working areas. However, it is also perfect for conference and meeting rooms that need to be rearranged quickly. This model is also an excellent choice for training courses and seminars – situations in which the furniture needs to be set up and moved around quickly as required. And not least, Alteo can be used as a desk in agile offices with changing usage needs. The Alteo frame has optional built-in mains sockets and USB ports on the side, with integrated desk-to-desk electric cabling. A whiteboard is also available, which can be fitted with a flip chart holder.

Left: solid walnut tabletop; middle: optional built-in mains sockets and USB ports; right: connection elements on an oak tabletop

Thanks to its versatility, the Alteo folding table can be rearranged in no time to create a wide range of layouts.

The mobile tables enable project workspaces and seminar solutions to be set up quickly as required. Below: A whiteboard that can be fitted with a flip chart holder supplements the Alteo furniture range.

About the designer: Angelo Pinaffo

The Italian designer was born in 1966 and initially studied art in Padua, completing his academic career with the "Architectural Design" course in Venice. Over the years he has focused as a freelancer on designing furniture for office, community, commercial and home use.

Since the start of his career, he has worked with architecture and design studios. He has also taken part in international architecture competitions and initially implemented projects in the areas of building restoration and museum exhibition design. His aim is to achieve an aesthetic and technical originality between form, function and industrial requirements.

About Girsberger:

The Swiss company group was established in 1889 as a woodworking shop in Zurich, and has developed to become an internationally renowned manufacturer of seating furniture. In the course of its development, the company has specifically expanded its in-house manufacturing operations and its exceptional craftsmanship in the areas of upholstery, solid wood and surface processing. Today its range of services includes high-quality furniture for offices, public spaces and homes, customized commercial furniture and the restoration and upcycling of used furniture (Remanufacturing). From Koblenz in Canton Aargau, close to the border with Germany, the solid wood trade unit supplies all types of wood-processing businesses with top-quality solid wood. Girsberger also has sales companies outside Switzerland, in a number of European countries. Production locations are situated in Bützberg (Switzerland), Endingen (Germany), Kraljevci (Serbia) and Silivri (Turkey). Since 1993 the international company group has been managed by Michael Girsberger, who is the great-grandson of the company's founder.

Girsberger introduced climate-neutral production in 2015 and was awarded the EcoVadis gold medal for its transparent, sustainable supply chain in 2019.
