

Liola – Extendable table with soft swivel mechanism

Girsberger has added a new extendable option to its portfolio of solid wood dining tables. The easy-to-use extension panel means that Liola can be extended by one metre on one side with no effort at all, thanks to a mechanism that makes the panel glide silently and smoothly into place when released. Liola was designed by Mathias Seiler, who not only created a solid wood version but also one with a black MDF extension panel.

Bützberg, 20.02.2024 – The side extension allows the Liola solid wood table to be extended by up to 100 centimetres. The tabletop and extension are made using long boards from a single trunk, so that the grain of the wood can continue without interruption. The soft swivel mechanism makes the table easy to extend. Liola is available in the various wood types in the Girsberger range, while the two-part extension is also offered in MDF painted black. Lengths of 180, 200, 220 and 240 centimetres are available, all with a width of 100 centimetres. The frame is made of black-coated steel.

Liola table – with black MDF extension

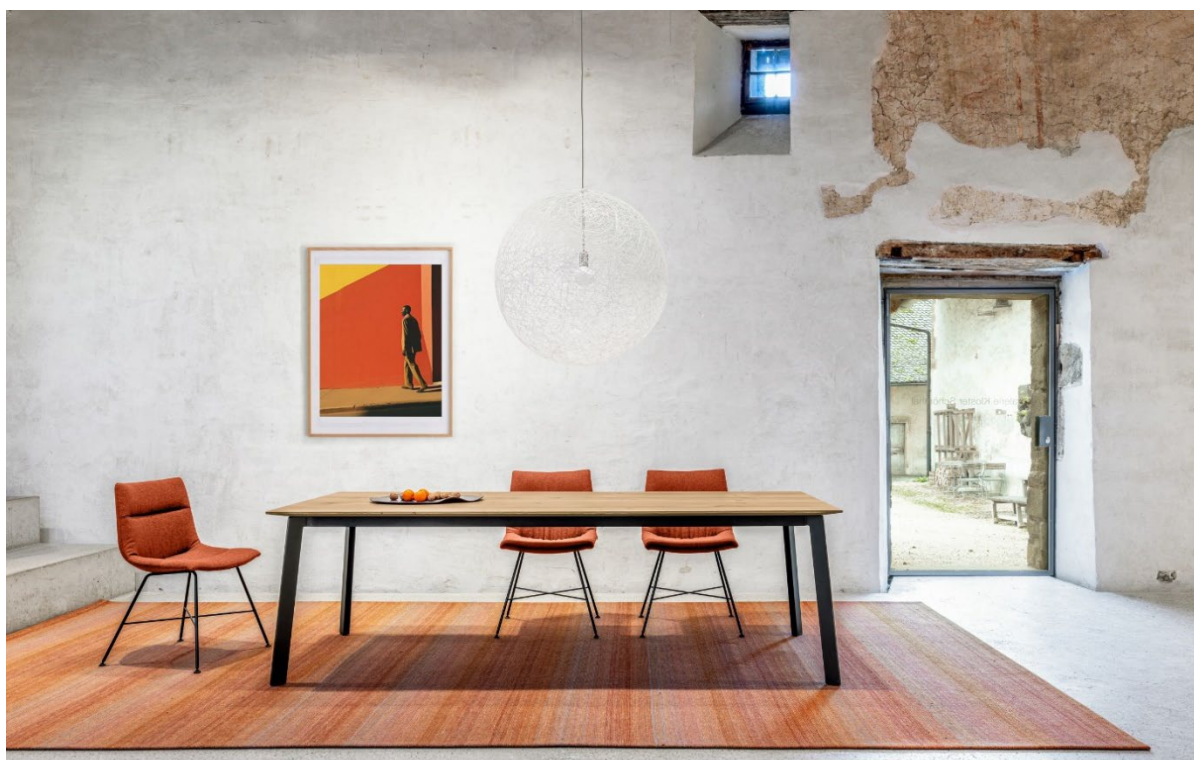

Retracted solid wood extension, American walnut table

The close fit of the extension function means that it is not visible within the frame. The bevelled edge gives the tabletop (here oak) a slimline look.

About the designer: Mathias Seiler

Mathias Seiler was born in 1963 and studied industrial design under Professor Dieter Rams at the HFBK University of Fine Arts Hamburg. He worked internationally as a product designer for various renowned furniture manufacturers, and received numerous awards. Mathias Seiler has had overall responsibility for design and marketing at Girsberger since 2010.

About Girsberger:

Founded in 1889 as a woodturning shop in Zurich, this Swiss group of companies developed into an internationally renowned manufacturer of seating furniture. Over the course of its further development, the company's own production facilities and the special artisanal expertise in the areas of upholstery, solid wood processing and surface finishing were systematically expanded. Today, the range of services includes high-quality furniture for office, commercial and private applications, project-specific, made-to-measure furniture (Customized Furniture) and the repair and upcycling of used furniture (Remanufacturing). From Koblenz, near the border with Germany, the solid wood trading division supplies high-quality materials to all manner of wood-processing firms. Girsberger is also present outside of Switzerland and Germany, with sales companies in several European countries. Production facilities are located in Bützberg (CH), Endingen (D) and Kraljevci (SRB). In August 2023 Danielle Quaile became CEO of the international group in the fifth generation of management.

Girsberger has pursued climate-neutral production since 2015. Girsberger Remanufacturing was named Winner of the German Sustainability Award 2023 in the “Design” category.
